Experiment-1:
basic cellular system using figma.

Aim:

To create an interactive diagram illustrating the components of a basic cellular communication system using Figma, showing the major components and the flow of signals between them.

Procedure:

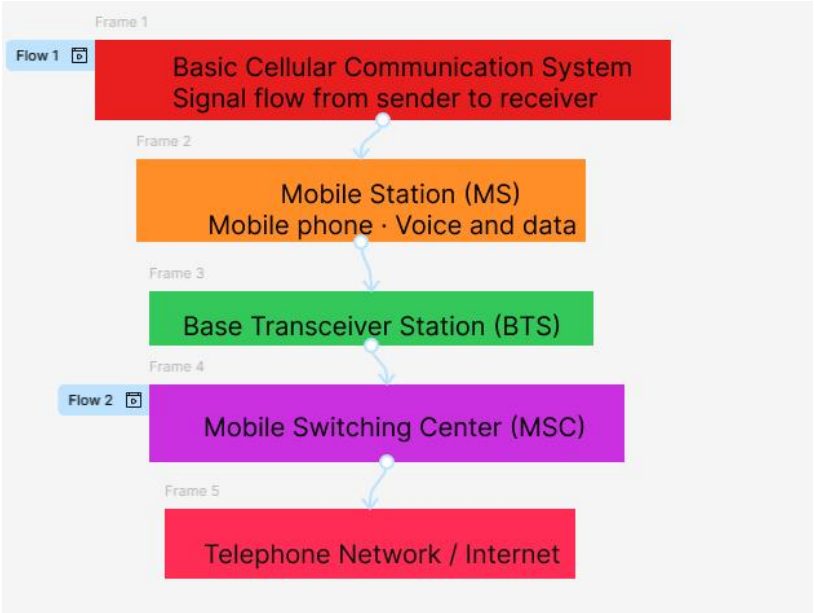

1. Open Figma and create a new design file.
2. Create a frame for the cellular system diagram.
3. Add shapes and icons to represent the main components:

- ❖ Mobile Station (MS)
- ❖ Base Transceiver Station (BTS)
- ❖ Base Station Controller (BSC)
- ❖ Mobile Switching Center (MSC)
- ❖ Telephone Network/Internet

OUTPUT:

RESULT:

An interactive diagram of a basic cellular communication system was designed using Figma. The diagram illustrates the major network components, their functions, and the flow of communication signals between a mobile station and the telephone network or internet.
